After winning the German Innovation Award in 2021 and 2022, EJOT has now been awarded again. The basic baseboard profile Pro BSOP-HL and the basebead profile Pro SOP for the design of recessed building bases on the external thermal insulation composite system (ETICS) have received the coveted award in the category "Excellence in Business to Business - Building & Elements". The German Innovation Award has been presented annually by the German Design Council since 1953 and honours design, brand and innovation achievements of international significance.

Basebead profiles are always used when the base of a building is designed to be recessed in an external thermal insulation composite system (ETICS). They form the lower horizontal end and seal the ETICS in the direction of the floor. The basic baseboard profile Pro BSOP-HL and the basebead profile Pro SOP combine the advantages of the established systems made of aluminium and PVC solid material and eliminate their disadvantages.

The basic baseboard profile Pro BSOP-HL (High Load) is unique in the international market. Thanks to an optimised, patent-pending product geometry, it offers numerous useful features when combined with the basebead profile Pro SOP such as a maximum dimensional stability, a low thermal transmission and a high flexibility. Together they form a powerful duo for the base area.

About EJOT®

The EJOT Construction Division caters to selected segments of the building industry. This includes professional applications on building facades and installation solutions for technical facilities inside the building. The main products are drilling and sealing screws, anchors, mounting elements and profiles for External Thermal Insulation Composite Systems (ETICS), chemical and mechanical anchors as well as fasteners for flat roofs and solar applications.

Whether it is the construction of the highest tower, the most spectacular nuclear reactor protective cover or the southernmost polar station in the world – EJOT customers rely on many years of experience in the building industry.

EJOT – that is more than 3,700 employees in 40 subsidiaries, more than 24,000 products and one hundred years of company history.
