d [mm]	l [mm]	d _h [mm]	Drive
6.0	80 – 300	14.0	TX30
8.0	80 – 400	21.0	TX40

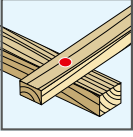

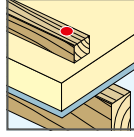

Bringing it together.

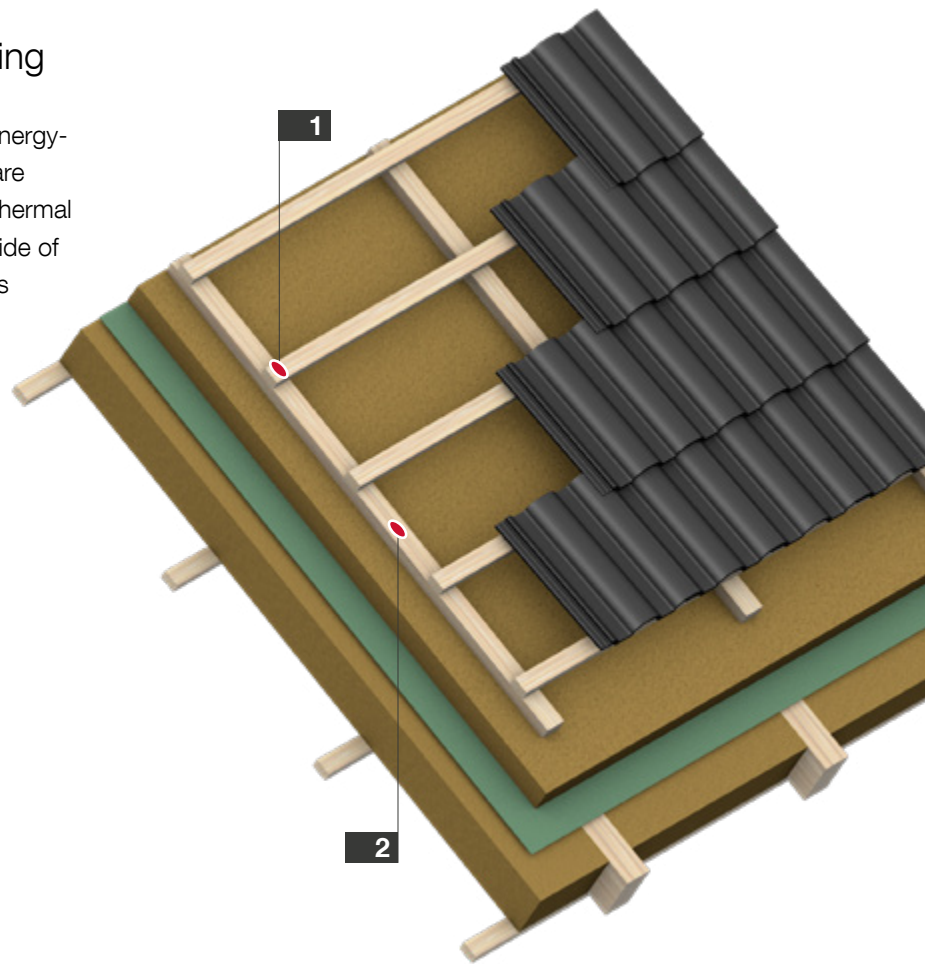

Above-rafter insulation

Efficient, clean and space-saving

Above-rafter insulation is considered to be energy-efficient roof insulation, because the rafters are correspondingly over-insulated as potential thermal bridges. As the insulation is built on the outside of the roof, the existing interior is retained in this insulation method. It is often used in renovations and new buildings.

Application examples

<p>1</p> <p>30 mm support lath on 40 mm counter lath</p>  <p>Wood screw JW2-STR- 4.0x70/42-V</p> 	<p>2</p> <p>100 mm above-rafter insulation fastening</p>  <p>Wood screw JW2-STS- 8.0x220/80-V</p>
